IDENTIFIERS *Austin Independent School District TX

ABSTRACT

This report contains summaries of dropout information as well as more detailed breakdowns that portray the dropout situation in the Austin (Texas) Independent School District in 1991-92. Statistics are reported in terms of annual rates as well as longitudinal rates. This report contains high school and junior high school rates for 1984-85 through 1991-92. The class of 1992 had a 4-year dropout rate of 25.2 percent. This is a higher rate than that for the class of 1991, and is not consistent with the previous decreasing trends in dropouts. The annual dropout rate for grades 7 and 8 has been decreasing since 1984-85. Hispanic Americans have the highest dropout rate for 1991-92. Overall, the dropout rate for high schools continues a 6-year decline, and all ethnic groups continue the trend. The dropout problem has improved in the district, but most schools continue to be at the "clearly unacceptable" level of the Texas Education Agency's Academic Excellence Indicator System. Fifty-seven figures present dropout statistics. Attachments include an additional 23 tables of dropout statistics. (Contains 40 references.) (SLD)

DEFINITIONS and FORMULAS

Dropout:
A student is reported as a dropout if the individual is absent for a period of 30 or more consecutive school days without approved excuse or documented transfer, or fails to reenroll by September 15 of the following school year without completion of a high school program.

Cohort:
A group of students observed through a number of years; e.g., all students who entered seventh grade for the first time in 1988-89. This is a closed group (i.e., no students are added to this group). This term is used in relation to longitudinal calculations.

School-year rate:

The percentage of students who drop out of school DURING THE SCHOOL YEAR.

$$\text{School-year rate} = \frac{\text{All students who dropped out during the period}}{\text{All students who were enrolled during the period}}$$

Example: Counting from September 1, 1988 to June 1, 1989

Annual (yearly) rate:
The percentage of students who drop out of school DURING A SINGLE PERIOD OF 12 MONTHS.

$$\text{Annual (yearly) rate} = \frac{\text{All students who dropped out during the period}}{\text{All students who were enrolled during the period}}$$

Example: Counting from September 1, 1988 to September 1, 1989

Longitudinal (cohort or group) rate:
The percentage of students who drop out of school from a single group that has been followed over a period of time.

$$\text{Longitudinal rate} = \frac{\text{All students who dropped out during the period}}{\text{All students in this closed group}}$$

Example: Counting from the year the group was in 9th grade to the year the rate is calculated.

If the reader of this report compares the numbers and dropout rates reported here with those reported before 1990-91, the reader will find differences. The changing nature of statewide dropout reporting required retroactive recalculation of numbers. However, the 1990-91 report and this report contain comparable results.

1991-92 Dropout Report

Executive Summary

Austin Independent School District
Office of Research and Evaluation

Authors: Vicente Paredes and Mario Sanchez

Program Description:

The Office of Research and Evaluation (ORE) annually collects dropout statistics for grades 7-12 in AISD. This report contains various summaries of dropout information as well as more detailed breakdowns.

Dropout statistics are reported in terms of annual rates (dropouts during the period of a year) as well as longitudinal rates (dropouts over time for a particular group). This report contains high school rates for years 1984-85 to 1991-92. Grades 7-8 annual rates are reported for the years 1984-85 to 1991-92, and longitudinal rates for the years 1985-86 to 1991-92. Other ORE reports contain dropout statistics as early as 1983-84.

Major Findings:

- The class of '92 had a four-year dropout rate of 25.2%. This is a higher rate than the class of '91 which had a four-year rate of 24.4%. This is not consistent with the previous decreasing trends (Page 5).
- The grades 7-8 annual dropout rate has been decreasing since 1984-85. The annual rate has again decreased from 4.9% in 1990-91 to 3.8% in 1991-92. Hispanics have the highest dropout rate for 1991-92 (4.9%) (Page 3).
- Overall, the 1991-92 high schools (grades 9-12) annual dropout rate (9.6%) continues a six-year decline and is the lowest since dropout accounting began. All ethnic groups show a decreasing trend. Hispanics had the highest annual dropout rate for 1991-92 (13.2%) (Page 4).
- The class of '93 has a three-year dropout rate (17.2%) lower than the class of '92 (19.0%) and might continue the decreasing trend in four-year rates (Page 6).

Implications:

The District's dropuout problem has improved, but most of AISD's high schools continue to be at the CLEARLY UNACCEPTABLE level of TEA's Academic Excellence Indicator System (AEIS), which is used for accreditation.

Recommendations:

The District must develop better dropout prevention programs and practices.

INTRODUCTION

WHAT IS AISD'S DROPOUT RATE?

There may be no question more frequently asked about AISD by education professionals, the media, and the general public than this one: "What is AISD's dropout rate?" This is a question for which there are several different--and correct--answers, depending on the context the inquirer has in mind.

Some high school examples may help clarify these differences.

- If someone wants to know how many high school students drop out during a school year, then that number is typically around 10% and is called the school-year dropout rate.

- If someone wants to know how many students drop out during the standard four years of high school, then that number is typically around 25% and is called the longitudinal rate.

Because educators and the public ask their questions about dropout rates in many different ways, there are many more than these two definitions of dropout rate.

The Office of Research and Evaluation (ORE) calculates a school-year dropout rate, an annual rate, and a longitudinal rate for grades 9-12 and for grades 7-8. These rates are calculated overall and for each ethnic group.

- The school-year dropout rate is the rate for students who dropped out during the nine-month school year from September to June.

- The annual rate is the rate for those students who dropped out during the entire twelve-month period from September to September. The annual rate adds in the summer dropouts but also subtracts those school-year dropouts who transferred, graduated, or returned to school at the end of summer.

- The longitudinal rate is probably the rate that most inquirers have in mind when they ask for a dropout rate. It is the rate of students who drop out over their high school career. It is calculatedby tracking the students individually from the time they first enter ninth (or seventh) grade over a period of years.

Although it may not be immediately apparent, the sum of the annual rates is not equal to the longitudinal rate. The cross-sectional annual rate is calculated across multiple grades. The longitudinal rate is calculated for a single grade across time.

This report provides dropout rates for eight school years, 1984-85 through 1991-92. For a number of years, annual dropout numbers have been calculated as of October 1 of the following school year. This is done in order to include summer dropouts, summer transfers, and summer graduates. Previous to this, an annual school-year dropout number was calculated as of July 1. For the purpose of comparison across years, school-year dropout numbers are included in the appendix of this report.

The Texas Education Agency has established a State standard of 1% for the annual dropout rate. Schools and districts meeting this standard are considered to be excellent. In the summer of 1993, the commisioner of education published the commisioner's revised criteria of 3.5% as a level below which schools would be recognized as effective. Schools and districts with annual dropout rates between 3% and 6% are accredited, and schools and districts with annual dropout rates higher than 6% are considered to have "unacceptable performances."

DEFINITION AND METHOD

The definition of a dropout has not changed over time. A dropout is a student who has withdrawn from AISD and whose records have not been requested by another school or district.

In July 1986, a longitudinal computerized database (the Secondary Student Longitudinal File, or SSLF) was constructed. The SSLF enables us to answer questions about the enrollment status of any group of students at any point in time, beginning with the 1983-84 school year for high school students and the 1985-86 school year for seventh and eighth graders.

Our method for assigning dropout status codes is as follows:

- Each year's cohort includes all students enrolled in an AISD high school at any time during the school year.
- Any student who withdraws from AISD is first considered a dropout.
- If the student's records are requested by a district, school, or other institution offering a high school diploma, the student is judged to be pursuing an education and his/her classification is changed from "dropout" to "transfer." For more details on this point see next page.
- In the fall following each school year, a dropout status is assigned to each student on the file. Possible statuses are:
  - Currently enrolled as of September 15.
  - School-year dropout (withdrew during a school year, with no records request by the end of the first six weeks).
  - School-year transfer (withdrew, records requested).
  - Graduated.
  - Died (while a student, not after dropping out).
  - Summer dropout (completed a school year, but did not enroll in the fall by September 15, and no records requested by the end of the first six weeks).
  - Summer transfer (completed a school year, did not enroll in fall, records requested).

The annual dropout rate is calculated by dividing the total number of dropouts (school year plus summer) by the total enrollment. This can be done for any subgroup of interest.

COUNTING 7th-8th GRADE DROPOUTS

ORE has reported annual dropout rates for grades 7-8 for several years, but we have always urged that they be interpreted very cautiously because their accuracy is questionable. The problem is that junior high schools do not always request transcripts for their incoming students, probably because graduation credits are not an issue at that level. Hence, the number of students in grades 7-8 counted as transfers may be lower than the actual number of transfers, possibly resulting in an unreliably high dropout rate.

During 1986-87 steps were taken to assess the extent of this problem and to increase the accuracy of the 7th-8th grade numbers. After the extent of the problem was assessed, the first step taken was to emphasize to the schools that a written request for any records, not just a transcript, constituted valid evidence that the student was enrolled and should be reported to ORE. The second step was to supply the junior high schools (and now middle schools) with postcards to give to students who withdrew. The student was to be told to give the card to an official at the school in which he or she enrolled. The official was to indicate that the student had enrolled, sign and date the card, and mail it to the student's former school. It was hoped that this would reduce the "false dropout" rate. (For a full discussion of this issue see the 1986-87 Dropout Report Pub. No. 87.M01.)

DOCUMENTATION OF STUDENT TRANSFER OUT OF DISTRICT

Until 1988-89 an official transcript request was the only accepted evidence that a high school student was attending a school outside the District. An official transcript request or a written request for any records was evidence that a grade 7 or 8 student was attending a school outside the District.

During the 1988-89 school year, under Texas Education Agency (TEA) guidelines, two additional methods of documenting a student's transfer out of the District were approved. The new methods are:

1. A parent's signed statement of intent to enroll the student outside of the District.

2. Confirmation of the student's transfer out of the District obtained by an AISD school official.

Two new forms were developed in response to the guidelines, and the previously used postcard was revised. (For further information see Documentation of Student Transfer Outside of District, ORE Publication Letter 88.K.)

Documentation of student transfers out of the District is recorded on a computer file. Prior to the 1991-92 school year, ORE made all entries to the file based upon paper documentation received from campuses. Since 1991-92, entries to the computer file have been made by each campus. The amount of documentation received and entered on the file has increased each year (for more detail, see 1990-91 Dropout Report, ORE Publication No. 91.12, p.3).

For the period July 1991 to the end of October 1992, there were 4,006 documented student transfers (unduplicated count) out of AISD. This is the period during which transfers for the 1991-92 school year were counted. Of these records, 1,972 (49.2%) were official transcript requests. The remaining transfers were documented by other methods described above.

HIGH SCHOOL DROPOUT RATES

This section displays, in various ways, high school annual dropout numbers as of October 1 of the following year.

Following are highlights of dropout rates by ethnicity across eight years (Figure 1).

- The dropout rate of American Indian students has fluctuated over the years because of the relatively small number in the District.
- Asian students had the lowest dropout rate of all ethnic groups in 1991-92 for the first time since 1987-88.
- Hispanic students have had consistently high dropout rates over the years.
- The dropout rate for White students has increased slightly over the past two years.
- Overall and for all ethnic groups, dropout rates show a decreasing trend.

A comparison of school year, summer, and total annual dropout rates for 1991-92 is presented in Figure 2. Most dropouts are school-year dropouts except for grade 12 which had more summer dropouts than school-year dropouts. Dropout rates by ethnicity, by sex, and by grade are displayed in Figures 2a, 2b, and 2c, respectively. Most annual dropouts are during the ninth grade year, which is the grade with the highest retention rate (Figure 2c).

Dropout numbers for LEP, Special Education, not Special Education, Honors, and not Honors students are presented in Figures 3 and 4 in two different ways. Figure 3 shows the proportion of dropouts who are members of the group. Figure 4 shows the dropout rate for the group. For example, Figure 3 shows that of the total number of dropouts (1,679), 2.7% were LEP Denials and 7.4% were LEP students who received services. However (see Figure 4), the dropout rate for LEP Denials was slightly higher (14.9% of LEP Denials) than LEP students who received services (14.8% of LEP Served).

AISD 9-12	17,587	1,679	9.6

HIGH SCHOOL LONGITUDINAL DROPOUT RATES

This section presents longitudinal dropout rates of ninth-grade cohorts. Cohorts, or groups of first-time ninth-grade students, are tracked over a period of up to eight years.

Dropout rates of the eight cohorts contained in this report are presented in Figure 5a through 5f. The overall rates are presented, as well as rates by ethnicity. The students in the cohort of 1989-90 ninth graders (Class of '93) are dropping out at lower rates than other cohorts (17.2% dropouts by year 3). The 1991-92 cohort (Class of '95) is off to a good start with a 6.7% dropout rate. This rate does not match the annual dropout rate for ninth graders because it includes only first time ninth graders.

The longitudinal rates are shown in more detail in Figures 6a through 6h. For each cohort the overall rate and the rates for each ethnic group are broken down into the number enrolled, graduated, transferred, dropped out and deceased. This information is given for each year up to 1991-92.

91-92	'95						4.1

Example calculations

For our calculations, we have divided the students into five categories that represent all possible conditions in which a student can be:

- Enrolled — Still enrolled regardless of how many years behind graduating class
- Graduated — Receivbed an AISD diploma
- Transferred — The District has evidence of enrollment somewhere else
- Dropped out — Has not attended school for 30 consecutive school days
- Deceased — The District has evidence that the student is deceased

Students may change from one category to another:

- A DROPOUT may REENROLL
- A student who is ENROLLED may GRADUATE
- A student may TRANSFER to another school
- A student who is ENROLLED may DROP OUT

The example below illustrates these changes.

	1987 1 year before graduation		1988 the year of graduation		1989 1 year after graduation		1990 2 years after graduation	
Class of '88	N	%	N	%	N	%	N	%
Enrolled	3166	61.0	391	7.5	79	1.5	27	0.5
Graduated	12	0.2	2394	46.1	2587	49.8	2629	50.6
Transferred	840	16.2	896	17.3	936	18.0	1010	19.5
Dropped out	1168	22.5	1504	29.0	1583	30.5	1519	29.3
Deceased	6	0.1	7	0.1	7	0.1	7	0.1

In 1988 there were still enrolled 391
In 1989 there were still enrolled 79
I.e., from one year to the next **312** moved out of this category and into

1988 graduates 2394
\+ **193** more graduated
1989 graduates 2587

1988 transferred 896
\+ **40** more transferred
1989 transferred 936

These three categories add up to **312**.

1988 dropouts 1504
\+ **79** more dropped out
1989 dropouts 1583

In this context, the increase of dropouts (from 29.0% to 30.5%) one year after graduation can be understood as a result of an additional 79 students dropping out. (It was pure coincidence that, in 1989, the number who remained enrolled and the additional dropouts were the same (79).)

Of those still enrolled (27) two years after their class graduated, some will graduate while some will drop out or transfer. Furthermore, some of the previous year's dropouts did reenroll and graduate, explaining why the rate of dropouts improved from 30.5 to 29.3 in the transition from 1989 to 1990.

GRADES 7-8 DROPOUT RATES

This section displays, in various ways, grade seven and grade eight annual dropout numbers as of October 1 of the following year.

Dropout rates by ethnicity across eight years are displayed in Figure 7, and figures 7a through 7f.

- The reported overall dropout rate for grades 7 and 8 has decreased from 11.2% in 1984-85 to 3.8% last year (1991-92).
- Since 1988-89, the ethnic group with the highest rate has been Hispanic for most of the years.
- Before 1988-89, American Indians had the highest dropout rate.

A comparison of school year, summer, and total annual dropout rates for 1991-92 is presented in Figure 8. There are more reported summer dropouts than school-year dropouts at both grades 7 and 8. Dropout rates by ethnicity, by sex, and by grade are displayed in Figures 8a, 8b, and 8c respectively. Figure 8c shows that most middle school dropouts are eighth graders.

Dropout numbers for LEP, Special Education, not Special Education, Honors, and not Honors students are shown in Figures 9 and 10 in two different ways. Figure 9 shows the proportion of dropouts who are members of the group. Figure 10 shows the dropout rate for the group. For example, Figure 9 shows that of the total number of grades seven and eight dropouts (380), 10% (38) were Honors students. However (see Figure 10), the dropout rate for Honors students compared to all students in grades 7 and 8 is only 1.2%.

AISD 7-8	9,939	380	3.8

*LEP = Limited English Proficiency. Denials indicates that parental permission for language services was denied.

GRADES 7-8 LONGITUDINAL DROPOUT RATES

This section presents longitudinal dropout rates of seventh grade cohorts. Cohorts, or groups of first-time seventh grade students, are tracked over a period of up to seven years.

Dropout rates of the seven cohorts contained in this report are displayed in Figures 11a through 11f. The overall rates are presented as well as rates by ethnicity. If we examine the dropout rates of these cohorts after three years (the year they are scheduled to finish ninth grade), we see that rates have been going down. After the third year, we see that for most groups, the dropout rate increases at a steeper rate. We know that most dropouts in high school are ninth graders and that the retention rate at high school is highest at grade 9. Therefore, we can conclude that many members of our seventh-grade cohorts are "getting stuck" in the ninth grade and eventually dropping out.

Longitudinal rates are presented in more detail in Figures 12a through 12g. For each cohort, the overall rate and the rates for each ethnic group are broken down into the number who enrolled, graduated, transferred, dropped out and deceased. This information is given for each year up to 1991-92.

PUBLIC EDUCATION INFORMATION MANAGEMENT SYSTEM (PEIMS)

This is the fifth year of the mandatory statewide data collection system. Dropout numbers are part of that data submission. The calculations of the dropout rate from the PEIMS data submission and the numbers submitted to PEIMS for AISD are on the next two pages. PEIMS uses a different cutoff date for reenrollment in the fall after a student has dropped out the previous school year and also uses a later date for transcript requests to be received; therefore, the PEIMS dropout numbers will vary from those given earlier in this report. Also, the numbers presented on this page (the numbers submitted to PEIMS) are different from the numbers on the next page (the numbers reported by PEIMS) because 11 dropouts that AISD reported were found in other districts in Texas.

There were 2,639 dropouts reported for 1987-88. This year, 1991-92, there are 1,958 dropouts. There has been a decline of 681 dropouts or a 26% decrease from 1987-88, with the largest percentage decrease at grades 7-8. Dropouts reported to PEIMS increased slightly from 1990-91 to 1991-92.

Dropouts Reported to PEIMS

	87-88	88-89	89-90	90-91	91-92	1 Year Change		Longitudinal Change	
Grades 7-8	647	499	418	360	330	-30	-8%	-317	-49%
Grades 9-12	1,992	1,856	1,601	1,511	1,628	+117	+8%	-364	-18%
Total	2,639	2,355	2,019	1,871	1,958	+27	+5%	-681	-26%

ADVANCED ACADEMIC COURSES ENROLLMENT	2,449	3.6%

ATTACHMENTS

In the following section, Attachment A presents information parallel to Figure 6 in the main body of the report. The difference is that numbers in Attachment A are reported in terms of a July cutoff date for data collection. Similarly, Attachment B reports information parallel to Figure 12 but with the July cutoff date. When dropout accounting in AISD started, a July cutoff date was used. These charts are included for the purpose of longitudinal comparison further back in time than is available with the October cutoff date.
